* WSLH reported that the 2 echoviruses were from the same patient.

* Enteroviruses are being detected sporadically in Wisconsin, but appear to be increasing.

* A California (LaCrosse) Encephalitis positive serology was reported by the WSLH; the patient is a 9 year old from Green County.

* Approximately 7% of respiratory specimens were reported positive this week; 6% for parainfluenza viruses (all type 3), and 0% for rhinoviruses, adenoviruses, RSV, influenza A and influenza B. There were **no** positive rotavirus specimens.
